Sorocaba - SP, Brazil.

Objective

Software Development / IT Intern

Systems Analysis and Development student at Facens, seeking an internship to apply and expand my programming skills. I work in technical support in an industrial environment (CNC machines), where I developed troubleshooting, clear communication with clients and teams, and fast learning. I build personal projects in Java and MySQL and have advanced English.

Professional Experience

Technical Support Assistant · Metalique Laser e Plasma CNC · Jan 2026 – Present

- Handled direct client support to understand requests, diagnose technical issues, and guide effective solutions.
- Acted as liaison between end clients and the technical/operations team, with assertive communication and expectation management.
- Identified operational needs and suggested improvements while maintaining high customer satisfaction.
